## EXPERIENCE

---

### Open Source Developer

GitHub

2020 – Present

- [code-racer](#) (700+ stars): Implemented the code racer feature, the main functionality of the project.
- [actual](#) (23k+ stars): Improved the CSV parser and enhanced the transaction page UI on mobile.
- [Timeline Studio](#): Paid to fix critical bugs and improve functionality.

### Software Engineer

Neusoft

May 2025 – Jul 2025

- Developed and optimized responsive front-end interfaces for an enterprise healthcare application; improved rendering performance and ensured consistent behavior across modern browsers.
- Built and maintained reusable component libraries with Element UI and Pinia to reduce duplication and speed up feature delivery.

### Front End Developer

Pre-History

Nov 2022 – Apr 2023

- Worked as a front-end intern on a platform ([bafundi.com](#)) that creates resumes and matches them with the perfect company using Vue.js, Nuxt.js, TailwindCSS, Astro and Pinia
- Collaborated with designers and backend engineers to improve UX and reduce client-side load time for key flows.

### Software Developer

Megadev

Apr 2021 – Sep 2021

- Built a file-sharing and management web application using ASP.NET, JavaScript, HTML and CSS.
- Designed and implemented a file-corruption detection algorithm for PDF/Word/PPT files to improve reliability of file-processing workflows.

## PROJECTS (MORE PROJECTS ON GITHUB)

---

### Less Share | [github.com/KaiBelmo/LessShare](#)

- Thesis project: full-stack P2P file-sharing platform using Vue.js and Express/Node.js, featuring a lightweight signaling server and real-time chat.

### Together | [github.com/KaiBelmo/together](#)

- A real-time YouTube watch-together app built with React, Express, and WebSockets, allowing users to sync videos in shared rooms.

### B1M0-dbg | [github.com/KaiBelmo/b1m0-dbg](#)

- Developed a Linux debugger from scratch with no external libraries to explore Linux internals and debugging mechanisms.

### My Personal Website (Win-95 Style) | [github.com/KaiBelmo/portfolio-win95](#)

- Portfolio website inspired by Windows 95, built using Vue.js, TypeScript, Pinia, SASS, and Canvas.

## ACHIEVEMENTS

---

- Winner — National CTF, ENSA Fes (2019).
- Discovered an anti-debugging technique in GDB ([proof of concept](#))

## EDUCATION

---

### Dalian Polytechnic University

Graduated with GPA 3.28/4.0

Bachelor of Computer Science

2025

## TECHNICAL SKILLS

---

**Languages:** TypeScript, JavaScript, C, Bash

**Front-end Frameworks:** React.js, Next.js, Vue.js, Nuxt.js, Astro, TailwindCSS, CSS3, Sass

**Back-end Frameworks:** Node.js (Express), ASP.NET, REST APIs, MongoDB, SQL, WebSockets, Authentication

**Developer Tools:** Git, VS Code, Vim, Visual Studio, Vite

**Strengths:** Performance Optimization, Debugging, Component Architecture, Responsive UI/UX, OSS Collaboration
